13 December 1965

Dear Boyd:

Subsequent to my brief discussion with Dr. Dan on the 8th, it dawned on me that it would be instructive to have Jack make some 10-20-40X enlargements of Will's resolution chart, once at the exposure level we used on the BPE, and once at proper level for the best resolution for the 260 line triplet. I'd like to see the results, so please make me a set too.

Thanks,

Rock
